You are too kind. There is so much to learn in the WQS program, but I am enjoying it greatly. I came to the region as the former Region 5 Beach Program Coordinator and my experience was limited to bacteria WQS, E. coli BMPs, grants, ESA issues and variances. Lucky you...

And now, lucky Standing Rock Sioux Tribe. I'm reviewing their draft WQS package now... By the way, Kylee, ND DEQ's former intern, who is Standing Rock's recently-hired hydrotech is fantastic. Great connection.

Thanks Holly. Do not under sell your involvement. Those who get a lot done always have a web of help. The more extensive the more effective and accurate.

Pete

Hi Pete, I looked at the equations and shared them with HQ. They look good.

Lars reiterated that the more information you put into your water quality standards about how to decide between *Oncorhynchus*-present versus *Oncorhynchus*-present waters, the better.

And trust me, it is not I who has been helpful. I'm just along for the journey, but very happy to learn as much as I can about this issue. So for that, I thank you.

Enjoy the rest of your day, Holly

Dear Holly:

I believe I have these correct but would appreciate a second set of eyes.

Easy to mess up equations in word.

If HQ or anyone has questions how we did our assessments for implementation, we use the most restrictive criteria (acute with both mussels and cisco).

You have been very helpful. Thank you. Pete
